

Sr. Fullstack Engineer

Location

Remote (US & Canada)

Type

Full time

Department

Engineering

Sardine helps neobanks and crypto wallets with fraud identification and advanced risk scoring. We're a rapidly growing but still small team. You'll be an essential part of building the next phase of the company.

You will:

- Design, build, and maintain scalable, reliable, and performant services and systems
- Build and launch new capabilities and products that bring significant value to customers
- Work closely with different engineering teams and product teams.
- Create and support user-facing technical documentation.
- Contribute cross stack and learn a wide variety of skills and technologies.
- Work with production systems and on-call process.
- Help shape our company's engineering culture and keep high engineering standards

We're looking for someone who has:

- 5+ years of experience as a Software Engineer with web frontend and web backend
- Experience in successful delivery of high quality production services and systems
- An ability to quickly grasp many different services and processes, and the knowledge of when and how to leverage them
- Empathy with their users and a strong customer focus
- Experience in developing SDKs or Frameworks would be a plus.
- Relevant industry experience would be a plus
- Knowledge on below technologies would be a plus

Technologies we use includes:

- bigtable
- postgres
- GCP dataflow (apache beam)
- bigquery
- ElasticSearch

- Metabase
- TypeScript (React + node)
- Golang
- Python
- Ruby

Benefits

- Remote-first
- Flexible PTO
- Health care and 401K
- Work from home stipend
- 7-year for post termination option exercise (vs standard 90 days)
